DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1, 18, 30, 38, 43, and 62 are allowed. The prior art discloses a high data rate (HDR) wireless communications network based on the TIA/EIA/IS-856 air interface standard, which allows for active users to share the air interface, and the network delivers data to individual users through the air interface one at a time.

The prior art however fails to disclose or suggest flexible user scheduling based on a range of utility function types, where utility functions describe the cost, benefit, or revenue gain associated with serving users, and jointly evaluating the utility functions to determine an "outcome" that would arise from serving the candidate under consideration to the exclusion of the other candidates, and serving the candidate having the most favorable outcome.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
